Fixed Wireless Access

Always connected. Wherever your business needs it.

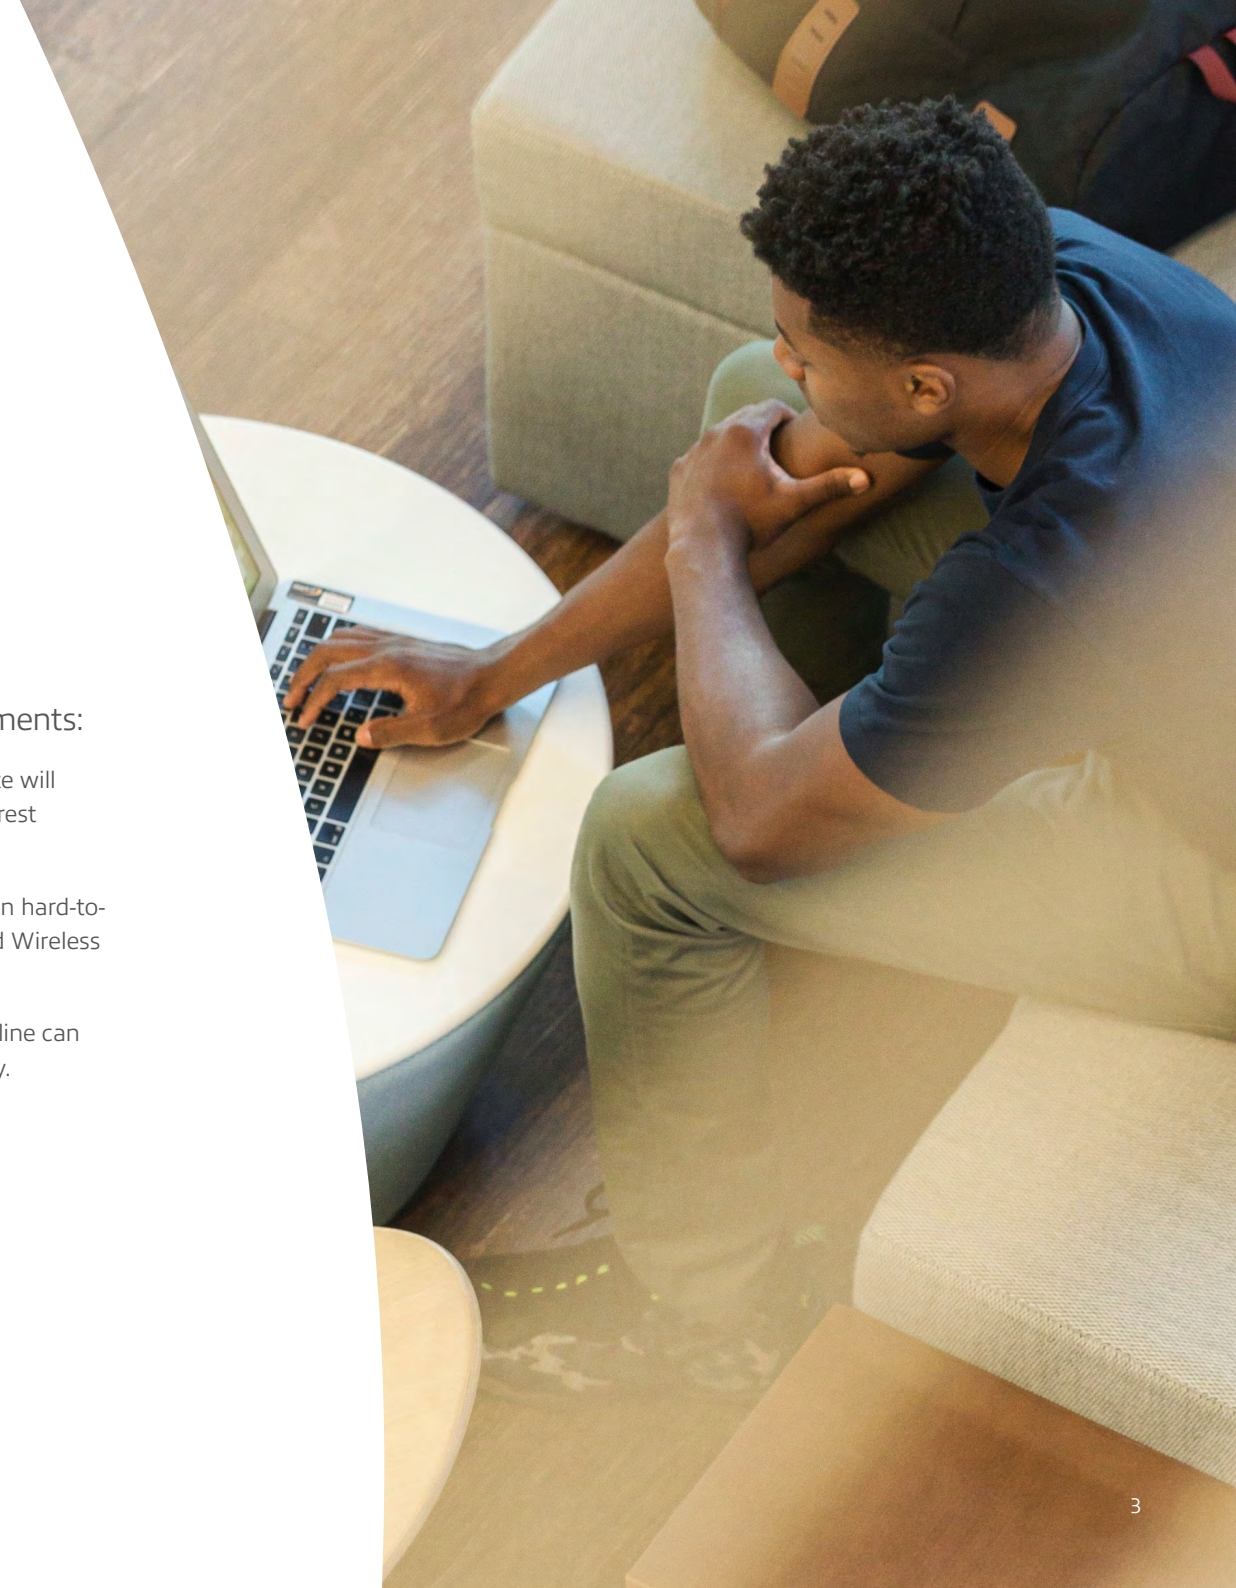

Connectivity is the lifeblood of business. Ensuring its continuity is essential for your customers and employees across all of your locations.

But maintaining an Internet connection isn't always guaranteed. In some locations you need the peace of mind that you have a back-up connection if there is a network outage. In others, wired connections might not be available or easy to deliver. Unless all your locations can be reliably connected, you cannot ensure that users can access the applications they need - with the performance they expect - to be productive. This requires a Fixed Wireless Access solution that encompasses everything you need to support business resiliency and growth.

Businesses need continuity and access to operate and scale, everywhere.

Maintaining business continuity hinges on the following requirements:

- **An always on, always connected solution:** With Fixed Wireless Access, your site will receive additional access connections that offer technology diversity. So you can rest assured that your site will always stay connected.
- **Access, even in remote locations:** Establishing branch offices or field locations in hard-to-reach areas can mean wired connections are not available or even possible. Fixed Wireless Access gives you that coverage to enable you to operate.
- **Fast, agile deployments:** Sometimes a business needs to launch before a fixed line can be deployed. This requires a connection that can be established easily and rapidly.

This is Fixed Wireless Access.

Expereo delivers agile Fixed Wireless Access using low-carbon-footprint equipment to provide local access to wireless networks. With Fixed Wireless Access, you gain a comprehensive solution that can span 190 countries. We provide robust and flexible connectivity when and where you need it, extending network reach into remote locations.

For locations that are temporary, hard to reach, or waiting for a Global Internet connection, Fixed Wireless Access can be set up quickly anywhere there is a mobile network available as your primary connectivity option.

Fixed Wireless Access can also resolve your business continuity challenges. Our solution is deliverable as a back-up connection or to provide a failover option to mitigate outages. This ensures the diversity needed so your sites will remain connected.

Fixed Wireless Access from Expereo gives you scalable, resilient connectivity.

Expereo's **Fixed Wireless Access** solution enables you to embrace the power of connectivity with flexible, agile, and resilient global coverage. Our unique global ecosystem means you can experience a host of benefits that support your business expansion and network performance, including:

- **Consistent connections to the strongest signal** with our vendor-agnostic SIM card. There are no ties to any single provider and you can be confident that you'll always be connected to the strongest signal available where you need it.
- **Shared data pools** mean you can share data across sites, this ensures an efficient use of your data if and when a site needs it, in a cost-efficient way.
- **Complete visibility of your entire network health** through expereoOne you have complete visibility of your data usage, and can receive notifications on your usage allowance. You can check the status and quality of your connections so you have complete control of your entire estate when you want it.
- **Support across every location** with dedicated regional teams of experts to help set up and manage your network.
- **The freedom to reach locations that fixed lines cannot** with flexibility and resilience, even to remote sites.
- **The ability to spin up services and locations as, when and where required** with fast deployment, so you can rapidly capitalize on new growth opportunities.
- **An "always-on" continuity solution** with technology diversity to ensure your network is highly available and your sites stay operational.

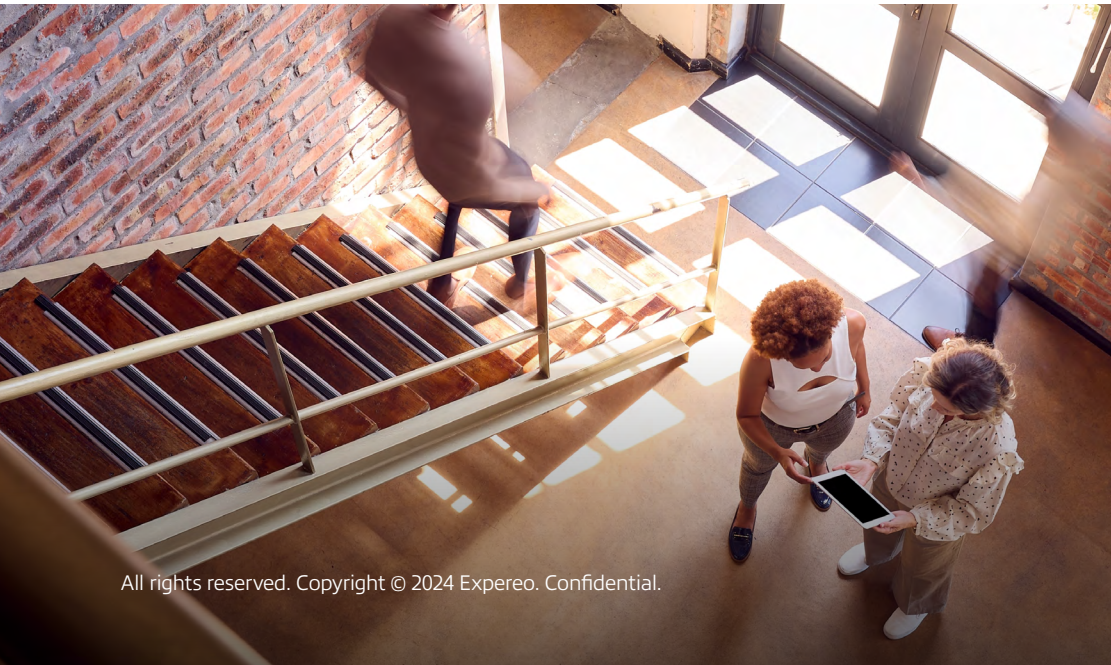

Complete visibility of your networks all in one place with expereoOne

Through our platform, **expereoOne**, you get a complete, intuitive view of your Global Internet services. For Fixed Wireless Access, this means visibility of all your data pools and bundles so you can see and control usage allowances around the world in one easy-to-use platform.

expereoOne gives you an accurate inventory of your orders, deliveries, site details, incidents, tickets and invoices. So you can keep track of your spending as well as your services, making decisions based on powerful insights about performance.

Real-time analytics and visualization make it quick and simple to see how services and locations are performing. You can identify any gaps and choose and deploy the solutions that you need to connect and grow your business. We can then work with you to flex and expand any services that are required, giving you more control of your network performance.

The only networking partner you need to thrive.

With Expereo by your side, you get support from experts in Global Internet connectivity. Whatever your connectivity challenge, we help you design, build, and manage the most appropriate network solutions for your business needs.

Here's what sets us apart:

Experience

At Expereo, we've been a crucial part of the Internet for over 20 years. We're an experienced global connectivity partner who can deliver a complete connectivity solution with Global Internet, Enhanced Internet and Fixed Wireless Access offerings.

Consultation service

As part of our Fixed Wireless Access service, experts will review your network, understand your needs and advise you on the best architecture for your business.

A truly managed service

With some Fixed Wireless Access solutions, businesses are left in the dark regarding the performance of their network infrastructure. With Expereo, you get real-time updates about your network performance and recommendations through expereoOne.

Global, local support

Wherever you need to drive connectivity and enable your teams, we have the dedicated support in-region to make it happen. We can design, source, implement, and support Fixed Wireless Access whenever you need it, wherever you are based.

An agnostic approach to vendors and providers

We can provide you with primary or back-up networks as needed with a vendor-agnostic approach that supports business continuity. Vendor-agnostic SIMs combined with our growing network of local providers ensures the best connectivity. In the event of a network failure you are automatically switched to another network.

Whatever your connectivity challenges, wherever your business goes, we can help.

From **Global Internet**, **SD-WAN** and **SASE**, **Enhanced Internet** to **Fixed Wireless Access**, we are here to take your network to the future with Expereo's world-leading IP connectivity solutions.

Talk to our expert team about your performance and business needs and we will help you identify, design, build, and manage the right combination of solutions to solve them. We are here to take your global network faster to the future.
