

Expereo Managed SD-WAN

Embrace SD-WAN with confidence

Welcome to the Intelligent Internet platform

Purpose-built SD-WAN that meets your needs now and in the future

SD-WAN is a vital part of a global connectivity strategy. It provides a high-performing network infrastructure and reliable application performance to guarantee good user experiences. But implementation and management can be challenging.

With managed SD-WAN from Expereo, we enable enterprises like yours to meet business objectives fast with a single supplier. We design, build, and run your global SD-WAN estate for you so you can focus on your strategic goals. Your business-critical applications are prioritized for guaranteed performance, enhancing your cloud strategies and keeping your business online.

You can rest assured you have the ability to anticipate, flex, scale and adapt your network efficiently whenever you need to. When you combine your overlay and underlay network and embed intelligence at every layer, you get the confidence of a resilient and scalable, always-on solution with exceptional network performance.

Welcome to the Intelligent Internet platform

An optimized network for easy global management

The Internet is a complex and unpredictable environment, and any SD-WAN network is only as good as the network it runs over. If it's poorly designed and managed, your business is at risk.

We combine our managed SD-WAN solution with Global Internet so you not only have high-performing connectivity, but optimized cloud capabilities. Our high-performing network removes the constraints that exist with legacy solutions, enabling you to deliver your specific business goals, while Expereo's managed services take care of the day-to-day management of your global networks.

Managed SD-WAN brings together our technical expertise with our best-in-class technology to ensure that your enterprise network can scale quickly to support your cloud initiatives. You gain global, comprehensive and supported services, wherever you are in the world.

Complete control over your network

Network optimization is made even simpler with our unique network visibility platform, [expereoOne](#). You gain a comprehensive view of your entire network estate, including SD-WAN with granular analytics and real-time insights.

With real-time data about application usage, network health and traffic patterns all from a single pane of glass, you have the tools to:

1

Optimize your network.

2

Enhance performance.

3

Ensure seamless user experiences in all your locations.

Why use Expereo's managed SD-WAN services?

SD-WAN solutions designed to meet your unique needs

Your business is unique and has specific connectivity requirements to support your different locations and complex network. That's why we offer a range of SD-WAN technologies to accommodate the unique requirements and budget of your global enterprise.

Dedicated support, whenever you need it

When an issue or incident arises, you need a team who can promptly address and resolve them, with minimal business disruption. Our managed service includes incident management, providing you with dedicated SD-WAN experts who are ready and available to offer comprehensive support.

Change management

As your business evolves, so does your network. Our team of experts is fully prepared to deploy any necessary changes. Whether it's scaling up or reconfiguring your network infrastructure, we efficiently implement the required modifications, ensuring your network remains aligned with your evolving business needs.

All the benefits of the cloud

With optimized global connectivity from Expereo, multiple transports ensure high-performance connectivity across all your business locations. This means users, wherever they are, have the best experience accessing any application and any workload in the cloud.

Welcome to the Intelligent Internet platform

Move to SD-WAN seamlessly, without the risk

With our profound understanding of the Global Internet landscape and local knowledge of last-mile connectivity, we're the ideal partner to assist you in deploying SD-WAN.

With Expereo, you get a trusted ally to guide you through the process of transitioning to SD-WAN.

With Expereo, you gain:

A purpose-built SD-WAN solution

Taking a consultative approach, we build the right SD-WAN solution for your business; with the right bandwidth and the right technology. All with global logistics management, local compliance and technology license management from us.

A high-performing network

Our in-house technology means we can guarantee against packet loss and latency to ensure that the performance you receive from our Fixed Internet service matches that of your MPLS network.

Seamless migration

Our expertise and efficient execution guarantee a hassle-free migration process, without disrupting your day-to-day activities. Throughout the transition period, you're free to continue your operations uninterrupted.

Local support around the world

Regardless of your site locations, we offer dedicated local support to assist you with device setup. Our SD-WAN certified experts configure the devices based on your specific global WAN requirements. And we have the global reach to provide you with in-region, local language support.

Active monitoring, 24/7

You gain the convenience of a single point of contact that efficiently manages all your global estate.
